### a few planting hints

**1.** Plants need watering for autumn root-growth. Water freely up until ground freezes.

**2.** Time of planting is important: Evergreens best from now to early October (they need late Fall for root growth) — deciduous plants from October to frost

**3.** Birch and Magnolia are best moved only in Spring when sap is running. Fall planting of these can be done: — (a) By digging with an earth ball. (b) By using small sizes only.

**4.** Very small evergreen seedlings are likely to frost-heave. Easily overcome: — Simply strew a thin mulch of salt hay in the beds.

### Is it hardy in Your Garden?

There is a northern limit for every plant, beyond which it cannot live. For practical use the map at the right divides the country into Zones. Each plant description in this Guide has a related Zone limit. Look up your garden on the map and you can select hardy material.

# KELSEY NURSERY SERVICE

50 CHURCH STREET, NEW YORK 7, N. Y.

# HEDGES

Fall (Sept. Oct.) is one of the best times to plant as they get a much earlier start the following Spring.

**Yew.** For any and every purpose in which Evergreens are required the Yew can be recommended Hardy in New England and Ontario, immune to most diseases and pests. Accommodating to an extraordinary degree, withstanding shade or full sunshine.

## The Yew Hedges

- TALL HEDGE, 5 to 8 ft. high, 3 to 4 ft. wide **Taxus capitata** (Upright Yew) — photo above —

6 to 9 inch XX	\$22.00	\$ 80.00	\$750.00
12 to 18 inch XX	30.00	97.50	950.00

- BROAD HEDGE, 2 to 4 ft. high, 2 to 4 ft. Wide **Taxus cuspidata** (Spreading Yew)

9 to 12 inch XX	20.00	65.00	600.00
12 to 15 inch XX	22.50	85.00	750.00

- LOW EDGING, 1 to 3 ft. high, 1 to 3 ft. wide **Taxus nana brevifolia** (dwarf Yew)

9 to 12 inch XX	30.00	97.50	950.00
12 to 15 inch XX	35.00	115.00	995.00

- NARROW TALL, 4 to 6 ft. high, 1½ ft. wide **Taxus media Hicksi** (Hicks Yew)

12 to 15 inch X	22.50	75.00	700.00
12 to 15 inch XX	40.00	150.00	1300.00

Many of our customers looking ahead a few years, are planting these fine evergreen hedges rather than cheaper barberry and privet.

In hedges, you can have the BEST for little expense. They appreciate in value each year.

## THESE 25 HEMLOCKS

(ENTIRELY NURSERY GROWN)

## FOR \$20

Quick-growing, hand-some evergreens. Grow in sun or shade. Hemlock makes the most beautiful of all hedges. (Space 18 inches apart in row.) May is ideal for safe shipping. You pay express on arrival (about \$1 per bundle of 25).

## TSUGA

**Canadensis** (Northern Hemlock). 60 ft. Zone III. In forests, a majestic patriarch, but readily sheared to hedge or modest specimen sizes. Humus. Stands shade. The most beautiful native evergreen.

Fill in the order form and enclose check. Shipment is made with express charges collected on arrival. You will get a prompt acknowledgment of order indicating approximate shipping time.

We will allow a credit of 50% of the catalog value of any stock that dies the first year. Credit to be used on future orders as you wish.

Unlike other things you buy, nursery stock must be ordered in advance—long before the right shipping time. Why? Because our whole year's shipments come in a few months' time and there is never enough help. Shipments are scheduled long in advance. Order now, we will ship at proper time later.

**PACKING COSTS**—Free if cash accompanies order, except stock dug with a ball of earth. Otherwise, packing is charged at cost (usually 10% of cost of stock). Balled, heavy evergreens: we will estimate costs in advance if you wish.

**PRICES**—Net at the nursery. Transportation to be added at actual cost. Usually 5 sold at rate per 10, 50 at 100 rate.

**PARCEL POST**—Must be prepaid. We prefer express but will send by post if instructed and charge you at cost.

**EXPRESS** charges are extra (except in a few prepaid Special Offers). They are paid by you to the Expressman. We will estimate these costs if you like, on your order completely delivered.

## Living Fence

### ROSA MULTIFLORA

No repairs, no maintenance problems, it just grows. No animals can get through, yet birds and small game can use it for refuge. It does not get out of hand, about 5 feet high, width not over 8 feet.

Plant a single row, 1 foot apart. Cut back roots to 8 inches, tops to 3 or 4 inches on planting. Mulching is very beneficial—leaves, hay, sawdust, or whatever you have. Effective in three or four years, mature in seven.

Supply limited and in heavy demand. Order NOW:

	6.00	55.00 475.00

OTHER EVERGREENS—See page 6 for small sizes, or ask for quotation.

# The Yews

Most useful and tolerant of all  
evergreens.

HOW TO USE YEWS—Decide your shape first: broad or narrow, tall or short. Nearly any ultimate shape and size you can want is available. This means little or no subsequent pruning need be done for maintaining the effect you want. Write for other kinds not listed here.

# RHODODENDRONS

## for Autumn

Evergreen shrubs with fine foliage and gorgeous colors. Range in size from dwarfs to giants; bloom from May to July; all colors. Culture: acid, damp, loose soil. Light shade. Use manure in fall. Do not cultivate, but mulch with very loose leaves or, better, leaf mold. Safe to plant in September and October. They need the rest of the autumn to get established. Water well in fall.

## NATIVE SPECIES

See "Young Native Aristocrats" on Page 20 in small sizes as well as large.

## BARGAIN IN YOUNG HYBRID RHODODENDRONS

8 to 12 inch B&B, assorted as you please (any 2) \$7.00, (any 10) \$30.00

**Lee's Dark Purple** - very dark and rich color. Large.

**Lee's Best Purple** - bright, handsome purple. Showy.

**Catawba Grandiflorum** - large, rosy-purple.

**Named White** - (we have too few of any one kind to offer, but will send good named white plants if you order White).

**Maximum Roseum** - late pink, extra hardy.

## A FEW LARGER HYBRIDS

The following 4 kinds, 12 to 15 inch B&B, any two packed for \$9.75.

**Roseum elegans** - rosepink, bushy.

**Lee's Dark Purple** - very dark

**Maximum Roseum** - late pink.

**Catawba Grandiflorum** - large rosy-purple blooms.

# Young Native ARISTOCRATS

Rhododendrons low as 35c, in few years, with little care, will be bushy \$10 specimens.

## Easy to Plant and Care for

Most people are surprised at the speed and ease of planting. Size 1 holes need a trowel only, 3 in. deep. Even Size 3 holes take but few good shovels full. Soak heavily after planting—and every 3 days for a month. Mulch heavily with old leaves.

PHOTO: A box of Size 3 rhododendrons has just arrived.

## SIZE 2: AS SMALL A PLANT AS LOOKS SHAPELY. 12 to 15 in. B & B. Clumps, 4 to 6 Stems.

These might be called "Junior Specimens." The ball weighs about 5 pounds per plant, individually burlapped. They are 2 years older than Size 1. Express runs about 20 cents per plant. You can expect some blooms the year after planting. These really "look like something" the day they are planted.

## SIZE 1: AS SMALL AS CAN BE SHIPPED SAFELY, 12 to 15 in. (Ball) Plants—1 to 3 Stem.

This special "Young Aristocrat" grade measures 12 to 15 inches with a small ball, weighing one or two pounds only. This stock is not to be compared for a minute with ordinary collected plants. It is on the contrary all carefully dug, the greatest pains being taken to preserve the roots. Carefully packed, it is easily planted and makes a quick start. Shipped from North Carolina, yet express runs only about 8c each (in 100 lots).

## Best Brownell Hybrid Teas

Bloom all summer long on hardier, longer-lived bushes. They have many more flowers than ordinary teas. If you want, you can get 10 or more on a stem; or you can disbud for single large blooms on long stems.

★**Pink Princess.** Bud red, flower deep pink. Free from premature defoliation. Blooms all summer.

**Shades of Autumn.** Showy red and yellow beauty.

**V for Victory.** Large, double, yellow, fragrant, profuse.

**Lily Pons.** Cream, large. Vigorous, free bloomer.

**Velvetier.** Velvety, deep, dark red. Sometimes in clusters.

**Curly Pink.** Clusters of large two-toned pink all summer. Vigor, health, and constancy. New.

★**Red Duchess.** Robust, sturdy large red. Outstanding fragrance. Grand new rose. Brilliant, attractive, free to flower. This fine new red has attracted instant friends wherever seen in the past year. All the color and size you could want but extra hardy!

★**Dolly Darling.** Pink, sunset and rose blend. Extra vigor and health. New.

**Queen o' the Lakes.** Sensational large crimson. New.

**Dick Wilcox.** Deep red, magnificent vigor and size. New.

**Tip Toes.** Spicy fragrance. Orange and pink blend. New.

This new race of roses adds to unusual hardiness a character of improving with age, rather than slowly deteriorating as most do. They are exceptionally easy to grow and bring into bloom. Disease-resistant.

**HARDINESS:** About Zone IV, but roots will survive still colder climates and even if tops damaged, new growth will be ready to bloom by rose time. Tops protected by hilling or burlap seldom kill back. Any plant that fails to bloom in 2 years will be replaced free anywhere in U. S. A.

### ★NO MORE BLACK SPOT!

Absolute resistance to this dread disease has been bred into three of these roses:

**Pink Princess**

**Red Duchess**

**Dolly Darling**

The only three such roses in existence. More coming.

## 4 Brownell Floribundas

Everblooming, hardy, bushy clumps.

**Tompkins Red.** Semi-double, velvet red all summer.

**Anne Vanderbilt.** Exquisite coppery orange, informal, semi-double, brilliant, fragrant. All summer.

**Lafter.** Sparkling orange and yellow, semi-double in clusters.

**Nearly Wild.** Larger than most wild roses, single pink flowers in clusters. Gives beautiful color all summer.

## 4 Brownell Creepers

For ground cover, on walls, on fences.

**Coral Creeper.** All the shades of ocean coral complementing other delightful rose tints. (June).

**Little Compton Creeper.** Deep rose-pink. Single flowers in clusters.

**Creeping Everbloom.** Light crimson. The first all-summer creeper.

**Magic Carpet.** Large, double blooms, yellow and orange tones.

## 5 Brownell Climbers

Vigorous, extra hardy, vivid. Note two everblooming.

**Elegance.** Very large, perfect bloom. White with shaded yellow center. Grand show.

**Golden Climber (Mrs. A. C. James).** Best yellow climber. Fragrant. Ideal for cutting.

**Copper Glow.** Deep coppery orange. Delightful spicy fragrance. Sensational color.

### SPECIAL-PRICED ROSES

(sold singly, only)

**Climbing Break O'Day.** Vigorous, everblooming apricot. \$2.00 each.

**Orange Everglow.** Constant copper-orange blooms. Fragrant, vigorous. \$2.00 each.

# Fruits for AUTUMN

## SELF-STERILITY OF FRUITS

●—self-unfruitful. Do not plant by itself, but always with another variety of the same fruit.

(P)—good pollinizer.

All can be planted in Oct.-Nov., almost a year gained over next Spring and identical success. A sod mulch helps. Plant fruits the same as you would any other deciduous trees and shrubs. Sweet Cherries are an exception: Risk is increased 5% to 10%.

**Dolgo.** Handsome flowering crab. Makes ruby red juice. Sept.

Every single kind offered on these pages is suitable throughout Northeast America, as far north as hardy.

### DWARF FRUITS BEAR USEFUL QUANTITIES

Dwarf fruits are not short-lived, but thrive and produce a generation or more. A space 25 ft. square will hold 4 dwarfs instead of one standard, and the 4 will bear about  $\frac{1}{3}$  more fruit than will one standard tree—and will do it 2 to 4 years quicker!

## Dwarfed Fruit Trees

A tree whose fruit is as large or larger than ordinary, but which never grows very tall—perhaps ultimately 12 to 15 feet. Space 12 feet apart.

A dwarfed tree can be sprayed, pruned and picked by hand without ladders, equipment or professional skill. Tree bears much earlier in life, in its third or fourth year at latest—often earlier—and carries amazing loads of fruit. Dwarfed fruits (especially Plums and Peach) are less liable to borers and other pests.

### PRICES: All kinds listed below:

1 year—Not branched. . . . .	\$2.60	} Add 50c. packing on orders under \$10.
2 year—Branched. . . . .	3.90	
3 year—Heavier. . . . .	5.25	

All three ages are about the same height. Most are 3 to 4 feet high, but apples often are still dwarfed.

### Kinds of Dwarfs Available

**Root Stocks:** Apples on Malling types: certain kinds on 1, 2, 3 or 7 for reasons based on long experience.

Also, apples are available on Malling 9—Extra Dwarf, not over 6 ft. Specify if No. 9 desired.

Pears are on Quince; Plums on St. Julien; other fruits on Almond.

# Sensational New Hybrid Grapes

It is astonishing how the public together with the majority of nurserymen are unaware of the tremendous progress that has been made during the last few decades in improving the various strains of grape vines that will grow in the rougher and colder climates of this country.

Throughout North America, from the eastern side of the Rockies to the Atlantic shore, grape vines are grown. But, the grapes they yield have an unpleasant foxy flavor, tough skin, coarse seeds, and other inferior qualities that make them undesirable either as table or wine grapes.

The Caucasian Grape (*Vitisvinifera*) is far superior to our native grape. This grape family, evolved in the milder parts of Europe and Asia, whence they were brought to California where they produced the excellent grapes that are familiar to the average American. However, these species have not the necessary make up to withstand our sub-zero weather and succumb disastrously to the diseases prevailing here; while our hardy Native Grapes remain immune.

Breeders like Seibel, Seyve Villard, Bacco, Rabaud, Oberlin, the Station in Colmar, and others have produced varieties that combine the wanted qualities of both species to produce the ideal grape vine. Namely, resiliency to our cold climate; diseases; and absence of all foxiness identical with the old Concord, etc. These Hybrid Grapes, possessing a pleasant sweetness and a certain native fruitiness, makes them in many respects far superior to the California as either fine table or excellent wine grapes.

They lend themselves to Spur pruning. This quality simplifies the pruning and care of the vines and permits one to easily train them into permanent pleasing patterns. This greatly modifies the yearly pruning without changing the shape or size of the trellis.

Even when grown on a six foot pole, they produce from 10 to 30 pounds of luscious grapes. The clusters are of immense size, some of the varieties have as many as 150 big clusters the second year planted.

## Grape Vines (Vitis)

**Old Varieties.** Disease free.  
Not less than 5 of one grape variety  
at 10 rate. Most hardy Zone IV.

(Each) (10)  
2-year .....\$ .60 \$4.50

**Concord.** Blue Strong flavor. Zone III.

• **Catawba.** Red, good wine.

• **Moore Early.** Large, early black.

2 Year No. 1

STURDY, WELL ROOTED VINES

\$2.50 per plant

**BACCO No. 1**—Fine strong growing plant, excellent for trellises, dark red, medium size berries, good wine and table grape.

**SEIBEL No. 1**—Black, long clusters, tart, fine for wine and jelly.

**SEIBEL No. 14**—Enormous big clusters, shouldered cluster, big berries, good table and wine grape.

**WESTCHESTER**—Roseat white, long clusters, very sweet, finest for table and wine, very abundant bearer, absolutely free of foxiness.

**MADELEINE**—White Muscat, big berried, long clusters, finest of table grapes.

**FLORENCE**—Pink, loose cluster, big berries, extremely sweet, very prolific, fine table grape.

**ANGELE**—Black medium berries, loose cluster, very sweet, absolutely vinefera, finest table grape.

**JACQUES WOLF**—Black grape, big cluster, fine for wine and jelly. Aestivalis X St. Jacques. Vinefera.

**SEIBEL No. 5860**—Good table and wine grape, white, good all around qualities.

**MARGUERITE**—Black grape, big cluster, good for table.

**ELLEN SCOTT**—Red, very sweet, fine table grape, has done excellently here in Westchester and Long Island.

Blueberry clusters life-size

Blueberries require an acid soil containing peat or other rotted vegetable matter. They need a moderate supply of soil-moisture, and good drainage so that the roots can get air during the growing season.

Set the plants in beds 4 feet apart each way. Several varieties should be in every planting, so an exchange of pollen will produce good crops of berries. Order "mixed" if you wish—we will assort for good pollenization. All varieties are almost equally fine.

# HARDY NUT TREES

## Grafted Black Walnuts

One of our most beautiful native trees, growing well in any fertile well drained soil. The grafted sorts bear their first nuts commonly in the third to fifth year. Zone IV.

**Ohio**—Fine quality nut, fairly fast growth, fairly easy to open.

**Thomas** is a rapid-growing tree. The meat is attractive and tasty, but does not crack as easily as the Stabler.

Plants twice transplanted, 3 to 5 feet,  
any 2 for \$10.00 (5 for \$19.50)

## PLANTING and CARE

The first two years mulch well with hay or straw. Water if drought comes. Keep all side buds from developing in useless low branches (below 7 feet). Do not plant deeper than they were in nursery.

## Hazelnuts

Plant at least two for pollenizing.

**American.** 9 ft. shrub. Zone IV. Tolerant, disease-free, excellent nuts.

3 to 4 feet.....\$2.00, 5 for \$7.75

**European** (avellana). 15 ft. Zone III. Even hardier, and larger nut.

3 to 4 ft. ....\$2.00, 5 for \$7.75

## Blight Resistant Chestnuts

**Chinese Chestnut** (*Castanea mollissima*). Similar to the American in flavor (sweet). It is inured to the Chestnut blight. Lives and bears in Zone V. Bears very young. Because of cross-pollenizing needs, we will not sell less than 3 trees.

# Huge Hybrid Blueberries

Really beautiful as specimens or in hedges. A 100-foot hedge will pay about \$25 worth of berries a year! (Spaced 18 inches.)

## Why Wait? Plant Some NOW!

And enjoy the berries sooner. Not only will they add beauty to your garden but each bush will pay for itself many times over! Hardy throughout U.S.A. Blueberries do fully as well with fall planting as with spring.

## VINCA (The Myrtle)

The most satisfactory, showy, trouble-free of all ground covers. The leaf is small, shiny, dark green all year round. Even in full shade, the leaves grow thickly. It spreads by underground roots. To be sure of coverage within (say) 2 years, we recommend spacing 18 in. apart. There are blue flowers, showy and cheerful, all spring long and the plant will grow and thrive in any soil including barren sand or clay banks. **Planting**—Clumps come tied compactly. Untie and spread out when planting.

# GROUND COVERS

## Prevent Erosion on Steep Banks

Steep slopes can be put into grass and mowed. But it is constant work and worry. The following plants do the job better. There are almost no maintenance problems. Four are inclined to get out of hand: Hedera, Lonicera, Rose and Vinca. They can, however, be rigorously pruned without the least harm.

### Ground Cover Specials

#### LONICERA japonica (Honeysuckle)

Sun or shade. Any soil. Vigorous.

1-yr. light . . . . .	6.00	30.00
12 to 18 in. X . . . . .	5.50	16.50 120.00

#### WILDTHYME (Thymus Serpyllum)

A mat in sun or light shade that blankets the ground. Evergreen. Can be walked on. Zone III. Set 12 in. apart. Well drained soil.

Sturdy plants . . . . .	5.50	16.75 120.00
-------------------------	------	--------------

#### HEDERA baltica (Hardy English Ivy)

Fine ground cover, in shade or sun. Does not climb readily. Zone V.

2 1/4-in. pots . . . . .	6.00	22.00 170.00
3-in. pots . . . . .	11.00	40.00 350.00

#### PACHYSANDRA terminalis

Tolerant in poor soil and shade. Set 3 to each sq. ft. Zone V.

	(25)	(100)	(1000)
Asstd. field-grown . . . . .	\$4.00	12.50	95.00

#### ROSE wichuriana (Memorial Rose)

Branches grow quickly, droop and root. Thick-set effect. Best in sun. Zone IV.

12 to 18 in. . . . .	11.00	40.00	375.00
----------------------	-------	-------	--------

#### ARCTOSTAPHYLOS uva-ursi (Bearberry)

Low matting evergreen. Best cover for sandy banks—succeeds even on sea-shore. Sun, drain.

Pot-grown . . . . .	5 for \$3.50, 100 \$55.00

## FERNS PREFER FALL

Each kind, \$2.75 for 10 (\$18.50 per 100)  
Five each any three kinds for \$3.95

- Christmasfern.** 12 in. Dry shade. Evergreen.
- Cliff-fern** (Polypody). 6 in. Evergreen, drain.
- Hayscented Fern** (Dunnstaedtia). 18 in. Tolerant.
- Maidenhair** (Adiantum). Rich, moist, but drained soil. Easily grown. Showy and popular.
- Toothed Woodfern.** 18 in. Evergreen. Damp soil.
- Sensitivefern** (Anoclea). Shade, heavy, moist. 12 in.
- Interrupted Fern** (Osmunda). 60 in. Damp, sunny.
- Cinnamonfern** (Osmunda). 60 in. Any moist soil.
- Ostrich Fern** (Pteritis nodulosa). 36 in. Very tolerant. This makes a delicious, nutritious asparagus substitute. Cut in "fiddle-head" stage, wash well, boil 30 minutes, salt, serve like asparagus.

**Acaule.** Dark rose.

**Pubescens.** Large yellow.

**Spectabile.** Showy pink.

# PERENNIALS that Prefer FALL

Iris, Peonies, Poppies, etc., have an autumn rest period for safe planting and dislike being disturbed at all in spring. Early blooming kinds are not sufficiently established after planting to bloom the same year. If set in September-October, their roots are ready and blooms show next spring. Water well once a week until freeze-up, mulch the first winter. Orders less than \$3.00, add 35c for postage and packing.

## NEW IRIS

Modern varieties are amazingly larger and brighter than old kinds.

### BEARDLESS IRIS

## Order Tulips Now!

This Year's Choicest Kinds—at Lowest Prices!

Once again we offer Holland-grown tulip bulbs. In no other bulbs, perhaps, is origin of stock so important. The tulip is a cold weather plant and the cool summers and mild winters of Holland suit its propagation to perfection. America has, true, made strides in growing tulips during the war, but we have nowhere a "Tulip Climate." The usual top-size for American-grown tulips is 10 to 11 cm. in Holland it is 12 to 13 cm.

# Spring Bulbs for Fall Planting

We have concentrated on the few best kinds of each class now in quantity production. The result is easy, intelligent selection by you and—lower prices, for top size bulbs.

Your bulbs are specially selected for you in Holland. No finer quality exists—no finer varieties—anywhere at any price.

We ask that if possible you order three weeks in advance of your desired planting date—in fact, it is best to order at once on receipt of this catalog.

All bulbs in this catalogue are (unless otherwise stated) the largest sizes commercially available from Holland. This is very different from such sizes as "Jumbo," "1st size," etc., which are NOT the largest available.

## Bulbs for Naturalizing

It is not generally realized how many kinds of bulbs may be permanently planted, giving a yearly show of bloom. There are two kinds of bulbs—those which last 5 to 7 years (like tulips), and those which are permanent, sending up a flower every season from the same bulb for a lifetime (Narcissus, Scilla, Muscari, Crocus)

### Naturalizing Narcissus

Narcissus are the showiest of the really satisfactory naturalizing bulbs. It might be said that the best place to plant these is not in the garden at all—but scattered among shrubbery, under fences and wherever a drift of April show is desired. Not all kinds do equally well when naturalized, and we have selected a special assortment for this purpose which we list below:

**Narcissus Naturalizing Mixture.**  
cups and daffodils. Grand show.
